WHEREAS, Licensor is a developer of certain semiconductor fabrication equipment used to deposit conductive and dielectric layers onto an integrated circuit ("IC") substrate;

WHEREAS, Licensor owns, or has the right to use, certain intellectual property rights for performing deposition of active conductive layers onto an IC substrate which is useful in the production of IC devices;

WHEREAS, Licensor and the Company desire to enter into a business arrangement where the Company shall have the rights to manufacture and sell the Licensed Products (as defined below) using the Licensor Intellectual Property (as defined below) in exchange for the Company making certain royalty payments to Licensor;

WHEREAS, in addition to such royalty payments to Licensor, within forty five (45) days of signing of the amendment to the SEC License Agreement, as further defined herein below, the Company shall pay 5 Million US Dollars to Licensor as a business initiation fee for the future cooperation between the Parties and the worldwide and exclusive distributorship granted to the Company hereunder and pay additional 5 Million US Dollars for certain specific research and development projects (the "R&D Work") as defined in Exhibit A attached hereto; and

WHEREAS, the Company shall contract Licensor for the manufacturing of certain Licensed Products or components thereto under the terms and subject to the conditions of a manufacturing agreement (the "Manufacturing Agreement") to be executed between Licensor and the Company.

NOW, THEREFORE, in consideration of the foregoing and of the terms and conditions set forth below, the parties hereto agree as follows:

I. DEFINITIONS

As used in this Agreement, the following terms, whether used in the singular or plural, shall have the following meanings:

- A. "ALD Products" means any commercial apparatus, machine or equipment for depositing thin films, wherein such a deposition is performed by the ALD Technology.
- B. "ALD Technology" means atomic layer deposition technique which utilizes a sequential application of reaction vapor through multiple ports onto various substrates.

Notwithstanding the foregoing to the contrary, materials, trade secrets or other information which is orally or visually disclosed by a Party, or is disclosed in writing without an appropriate letter, stamp or legend, shall constitute Confidential Information if the disclosing Party, within sixty (60) days after such disclosure, delivers to the other Party a written document or documents describing the materials, trade secrets or other information and referencing the place and date of such oral, visual or written disclosure and the names of the persons to whom such disclosure was made.
- D. "COGS" means the cost of material, labor and burden, the detailed calculation method of which shall be set forth in the Manufacturing Agreement. The Company shall pay Lessor additional commission at the rate of 5% of the Net Sales Price of the Licensed Products when sold to Korea, and to use, reproduce, modify, enhance and create derivative work of the Lessor Technology; provided that following the expiration or termination of this Agreement, Lessor's license of Lessor Technology to the Company shall become non-exclusive and worldwide (including Korea) and shall be perpetual (ie. such license shall survive the expiration or termination of this Agreement). In addition, within sixty (60) days of the execution of this Agreement, at no additional cost to the Company, Lessor shall enter into an amendment agreement to a license agreement dated August 8, 2000 between Lessor and Samsung Electronics Co., Ltd. (“SEC”) (the “SEC License Agreement”) with SEC, which shall be substantially in the form attached hereto as **Exhibit B** and at a minimum contain the following provisions: (a) to cause Lessor's license from SEC under the SEC License Agreement to be sublicensed from Lessor to the Company and (b) to lengthen the term of the SEC License Agreement to be at least the same as the term of this Agreement.

B. Technology Transfer. Lessor shall provide the Company with all information related to the Lessor Intellectual Property as may be known or possessed by Lessor and as may be reasonably necessary for the Company to exploit the licenses granted in Section II.A in the following manner. Starting immediately upon the execution of the Agreement, Lessor shall transfer to, and train and educate, the Company the Lessor Intellectual Property, which is necessary or useful for the Company (a) to engage in sales and marketing activities and (b) to prepare certain employees of the Company to facilitate the installation and demo ready of the First Demo tools. Immediately upon payment of the business initiation fee of 5 Million US Dollars and additional 5 Million US Dollars for the R&D Work pursuant to Section X.F, Lessor shall transfer to, and train and educate, the Company the Lessor Intellectual Property, which is necessary and useful for the exercise of the rights granted under Section II.A. The scope of such technology transfer is further described in **Exhibit C** attached hereto. Technology transfer from Lessor to the Company shall take place in Korea and the Company shall be responsible for costs associated with its own employees, including travel and lodging expenses, and necessary technology transfer from the Company to Lessor shall be done at the Company's Scotts Valley site and Lessor shall be responsible for costs associated with its own employees, including travel and lodging expenses. Lessor shall provide to the Company access to the Lessor Intellectual

Property during the term of this Agreement. Upon discovery of any modification or improvements in the Licensor Intellectual Property, Licensor shall immediately disclose such improvements and provide them to the Company.

C. Assistance. Licensor shall not be required to send its own staff to assist the Company to service and support the Licensed Products sold to end customers. The Company shall reimburse Licensor for any and all out-of-pocket expenses (including, without limitation, travel and lodging expenses) incurred in connection with the provision by Licensor of such assistance to the Company.

D. Licensor shall retain all ownership of the Licensor Intellectual Property, whether or not specifically recognized or perfected under the laws of the jurisdiction in which the Licensor Intellectual Property is used or licensed, and the Company shall obtain no ownership rights thereto under this Agreement; provided, however, that the Company shall own all modifications, enhancements and derivative works (the "Derivative IPs") of the Licensor Technology developed by or for the Company during the term of this Agreement. During the term of this Agreement, the Company hereby grants to Licensor (a) a non-exclusive, non-transferable, world-wide, and royalty-free license under the Derivative IPs to make or have made the Licensed Products, (b) an exclusive, non-transferable, and royalty-free license under the Derivative IPs to use the Licensed Products in Korea and sell the Licensed Products to customers in Korea to be used in Korea (except in situations where Licensor's customers in Korea decide to purchase IPS Hub based Licensed Product and use it outside of Korea), and (c) a non-exclusive, non-transferable, world-wide and royalty-free license under the Derivative IPs to use and sell the Licensed Products to the Company and its affiliates, as when and if requested by the Company; provided that following the expiration or termination of this Agreement, the Company's license of non patented Derivative IPs to Licensor shall become non exclusive and world wide (including Korea) and shall be perpetual (ie. such license shall survive the expiration or termination of this Agreement). The Company shall inform Licensor of any modifications, enhancements and derivative works it makes to the Licensor Technology promptly after its origin.

E. The Parties shall review the option of jointly developing the next generation high performance platform for the Licensed Products. If the Parties agree to pursue the development jointly, then the Parties shall enter into a separate joint development agreement. Such joint development agreement shall address, among others, conditions under which Licensor has the right to sell the next generation product in Korea.

F. The Company shall offer to sell ASML Hubs to Licensor for the purpose of enabling Licensor to sell ALD Products based on ASML Hubs to customers located in Korea. The Company shall offer competitive pricing to Licensor for ASML Hubs, and shall provide necessary technical support to Licensor for assembly and integration.

III. MINIMUM PURCHASE REQUIREMENTS

A. Purchase. During the entire term of the Agreement, Licensor shall offer to sell to the Company the Licensed Products or any components thereto, including the IPS

Units. Except as stated in Sections III.D. and III.E., it is agreed and understood by the Parties that the Company shall not have any obligation to purchase the Licensed Products or components thereto.

B. Purchase Orders. The Company shall issue purchase orders to Licensor to purchase the Licensed Products or any components thereto. Except as stated in Sections III.D. and III.E., until such purchase orders are issued, the Company shall have no obligation to purchase the Licensed Products or components thereto.

C. Price. Licensor will offer the best pricing to the Company for Licensor products and components, including, without limitations, the Licensed Products and IPS Units.

D. Demo Tools.

(i) The Company shall purchase from Licensor one 200mm two (2)-process module demo tool (complete system with subsystems (O₃ generator, pump, scrubber and catalyzer) and options (including gas box)) (the "First Demo Tool") fully assembled by Licensor at the price of US\$1.8 million (CIP, Seller's Scotts Valley Site), containing Al₂O₃, HfO₂, Ta₂O₅ and TiN ALD process modules. The Company shall submit to Licensor a letter of intent (the "LOI"), which shall contain necessary information, such as specifications, to enable Licensor to start the manufacturing of the First Demo Tool, to purchase the First Demo Tool within two (2) weeks of the execution of the Agreement and shall issue a purchase order for the First Demo Tool within forty-five (45) days of the Agreement. The First Demo Tool shall come with Licensor's standard warranty which shall be no less than one year from the date of acceptance or process qualified and shall contain other customary warranty terms and conditions. The First Demo Tool shall meet the same specifications that Licensor's tools met in its Korean lab.

(ii) The total payment for the First Demo Tool shall be paid to the Licensor in the following manner: 10% at the time of the submission by the Company of a purchase order therefor, 10% one month thereafter, 10% one month after the second payment, 10% one month after the third payment, 50% upon shipment, and 10% when the Demo Tool is process qualified (i.e., demo ready).

(iii) Licensor shall deliver the First Demo Tool at the Company's Scotts Valley site within 8 weeks from the date of the LOI; the First Demo Tool shall be installed within 4 weeks from the date of delivery thereof; and the First Demo Tool shall be demo ready within 4 weeks from the installation thereof. Licensor shall be responsible for the hardware installation, process startup and demo qualification of the First Demo Tool. The Company shall provide all reasonable assistance and support. The Company shall pay reasonable out of pocket expenses, including travel and lodging, for Licensor's personnel dispatched to the Scotts Valley site for (a) installation and startup of the First Demo Tool for up to two (2) weeks and for (b) process qualification of the First Demo Tool for up to two (2) weeks if two (2) process modules or four (4) weeks if four (4) process modules. Licensor shall be responsible for all its expenses, including its out of pocket expenses, beyond those periods. The Company shall be responsible for

bringing required facilities and utilities to, and completing ground work ready for, the First Demo Tool prior to the commencement of installation.

(iv) The Company shall purchase, under the same terms and subject to the same conditions as those for the purchase of the First Demo Tool, an additional 200mm-300mm-bridge demo tool (the "Second Demo Tool"); provided that in the event that the Second Demo Tool is a 300 mm system, then there will be an incremental cost increase in price associated with going from the 200mm to 300 mm configuration, upon receiving a purchase order from a customer for multiple Licensed Products, or the first of many purchase orders for a Licensed Product, to be used in a commercial production setting, not in R&D or other non-commercial production settings. The First and Second Demo Tools shall be referred to as "Demo Tools" collectively).

(v) Notwithstanding anything else to the contrary, the Company's commitment to purchase the Demo Tools is premised upon an assumption that Licensor shall obtain the amendment to the SEC License Agreement within sixty (60) days of the execution of the Agreement. In the event Licensor is unable to do so, without prejudicing its other rights and remedies, the Company shall have the right to return, and/or cancel any outstanding commitment for, the Demo Tools for a full refund of the purchase price.

E. Licensed Products and Components.

Provided that Licensor's products and components, including the IPS Units, meet the Company's specifications, quality requirements, and delivery schedules, the Company shall be obligated to do the following:

(i) The Company shall purchase from Licensor all required IPS Units, fully assembled by Licensor, for the first fifty (50) orders for any ALD Products, irrespective of whether such ALD technology is owned or controlled by Licensor, from the Company's customers within the Territory, at a unit price of the COGS plus (a) as a percentage of COGS reasonable future R&D expenses incurred specifically in connection with the development of the ALD Technology directly or indirectly beneficial to the Company, but not including costs associated with the R&D Work (up to US\$5 million), which is already paid by the Company and (b) a 10% markup (ex factory), which unit price shall not include any SEMI safety certificate assessment (including any modification or amendment thereto) and system installation related expenses which shall be borne by the Company. However, in the event customers of the Company choose to purchase ALD Products not based on IPS Units configuration, then for ALD Products after the first twenty five (25) ALD Products, the Company shall not be required to purchase IPS Units for such ALD Products. Instead, the Company shall be allowed to fulfill its obligations under this Section by purchasing modules from Licensor. The rate of substitution shall be four (4) modules for one (1) IPS Unit. For the avoidance of doubt, the Company shall not sell any ALD Product which does not contain IPS Unit manufactured by Licensor, until and unless the minimum purchase requirement under this Section III.E.(i) is fully satisfied by the Company.

(ii) In addition to the Company's obligation under Section III.E.(i), the Company shall purchase from Licensor, at a minimum, components or parts, which may be process chambers or transfer modules, (the "Components") the total value of which is at least twenty five percent (25%) of the Company's COGS of each Licensed Product sold; provided, that Licensor's prices, including its markup, for the Components are equal to or lower than 110% of the Company's COGS for similar items, and further provided that the Components meet the Company's specifications and other requirements, including quality and delivery requirements.

(iii) In the event that Licensor's sales price for the relevant Licensed Product or components and parts thereto purchased by the Company under Section III.E.(ii) or IPS Units purchased under Section III.E.(i) shall exceed the Company's COGS by 10%, Licensor shall, at its option, reduce the price of such product by an amount equal to such excess. If Licensor chooses not to reduce the price, the relevant component shall be deemed to have been purchased by the Company for the purpose of Section III.E.(ii) or Section III.E.(i). For the avoidance of any doubt, since the Company does not expect to have any actual COGS due to its obligations to purchase from Licensor under Section III.E.(ii) and Section III.E.(i), for the purpose of comparing the Company's COGS to the price of Licensor for a relevant Component, the Parties shall agree upon a method in the Manufacturing Agreement.

(iv) The provisions of the Manufacturing Agreement relating to COGS (including, without limitation, the calculation thereof) shall apply *mutatis mutandis*.

(v) The Parties shall meet every six (6) months to review any change in the Parties' COGS.

F. Purchase Terms. The terms and conditions of order, sale and purchase as set forth in the Manufacturing Agreement shall apply *mutatis mutandis* to all sale and purchase transactions made hereunder.

IV. ROYALTIES

A. Royalties.

(i) As a consideration to Licensor under this Agreement, the Company shall pay to Licensor royalty which shall be a fixed amount per ALD process module (a "Royalty Module") for each License Product sold by the Company, whether such Royalty Module is manufactured by Licensor or not and whether sold separately or as part of a system, in accordance with the following royalty payment schedule:

Number of Royalty Modules (cumulative during term)	Royalty per Royalty Module(US\$)	
	Al ₂ O ₃ and TiN Royalty Modules*	Other types of Royalty Modules
0 – 100	60,000	50,000
101 – 200	50,000	40,000
201 and more	40,000	30,000

* Only if such modules are manufactured by using the technology licensed under the SEC License Agreement.

(ii) The royalty payment schedule set forth in Section IV.A.(i) shall be applicable to single-wafer process modules only. The parties shall negotiate in good faith and determine a new royalty payment schedule for other types of Royalty Module by the mutual agreement between them when such other types of Royalty Module are developed and available for sale.

(iii) In the event of the termination or expiration of the SEC License Agreement, the royalty payment amount shall be reduced by (a) any royalty amount to be paid by the Company to SEC to continue to be licensed under SEC's intellectual property in the SEC License Agreement or (b) in the event the Company is unable to obtain a license from SEC, then the Parties shall reduce the royalty payment schedule and the minimum purchase requirement in Section III.E.(i) by a ratio of (i) the Company's revenues from the Licensed Products based on SEC IP (the numerator) and (ii) the Company's total revenues from the Licensed Products (the denominator).

B. Payment. The royalty payments pursuant to Section IV.A shall be made twice per annum, covering the periods of January 1st through June 30th and July 1st through December 31st, respectively. The Company shall deliver to Licenser within 30 days after the end of each period a written report showing its computation of royalties due under this Agreement for such period. Simultaneously with the delivery of each such report, the Company shall pay to Licenser all amounts shown to be due thereon by wire transfer of immediately available funds to a bank account designated by Licenser.

C. Tax. Licensor shall be responsible for all present and future taxes, including withholding taxes, imposed upon the royalty payments, except the Company shall be responsible for paying its own income taxes. The Company shall cooperate with Licensor in structuring the payment under this Article IV in the most tax efficient manner in order to minimize Licensor's tax burden; provided that the Company shall not incur any costs, expenses or liabilities in effecting such structuring.

D. Setoff. The Company shall be entitled at all times to off-set against any payments due to Licensor any amount owing at any time from Licensor to the Company.

V. REPRESENTATIONS AND WARRANTIES.

A. Authority of Licensor. Licensor hereby represents and warrants that (i) it has the legitimate and full authority to grant to the Company all of the rights it hereby grants, (ii) it is the sole inventor of the ALD Technology as described under the Licensor Patent Rights, and (iii) it owns the entire right, title and interest in and to, or authorized to use, as the case may be, all Licensor Intellectual Property. For the avoidance of doubt, Licensor does not warrant or guarantee the patent registration of any of the patent applications for the Licensor Patent Rights.

B. Validity of Licensee Intellectual Property. Licensee warrants and represents that the Licensee Patent Rights are validly issued and in effect, that no claim has been made contesting the validity of any of the Licensee Patent Rights, and that the use of the Licensee Intellectual Property as intended or contemplated by this Agreement will not constitute an infringement of the rights of any third party.

C. Disclaimers. EXCEPT AS EXPRESSLY SET FORTH HEREIN, NEITHER PARTY MAKES ANY WARRANTY WHATSOEVER, EXPRESS OR IMPLIED, WRITTEN OR ORAL, UNDER THIS AGREEMENT WITH RESPECT TO THIS AGREEMENT AND ANY RIGHTS LICENSED OR PROVIDED HEREUNDER.

VI. INDEMNIFICATION.

A. General Indemnification. Each Party (the "Indemnifying Party") shall indemnify and hold the other Party and its customers (the "Indemnified Party") harmless against any actual loss, damage, liabilities or claim, including reasonable attorney fees, which the Indemnified Party may hereafter incur, become responsible for or pay out as a result of death or bodily injury to any person, destruction or damage to any property, contamination of or adverse effects on the environment and any clean up costs in connection therewith, or any violation of governmental law, regulation, or orders, caused, in whole or in part, by (a) the Indemnifying Party's breach of any term or provision of this Agreement, (b) any negligent or willful acts, errors or omissions by the Indemnifying Party, its employees, officers, agents, representatives or sub-contractors in the performance of the Indemnifying Party's obligations under this Agreement, or (c) actual or alleged infringement of any third party patent, copyright, trade secret, trademark, maskwork or other intellectual rights arising out of the development, import, manufacture, use or sale of Licensed Products by the Company or its customers..

B. Third Party Claims. In the event that any legal proceedings shall be instituted or that any other claim or demand shall be asserted by any person in respect of which payment may be sought from the Indemnifying Party under this Section VI.A, the Indemnified Party shall promptly cause written notice of the assertion of any claim of which it has knowledge which is covered by this indemnity to be forwarded to the Indemnifying Party which shall at its expense be represented by counsel of its choice and defend against, negotiate, settle or otherwise deal with any proceeding, claim or demand which relates to any loss, damage, liabilities or claim indemnified against hereunder; provided, however, that the Indemnified Party may participate in any such proceeding with counsel of its choice and at its expense. The Parties agree to cooperate fully with each other in connection with the defense, negotiation or settlement of any such legal proceeding, claim or demand. The indemnifying Party shall permit the indemnified Party to participate in the defense or settlement thereof and agrees not to settle without the consent of the indemnified Party.

VII. LIMITATION OF LIABILITY.

IN NO EVENT SHALL ANY PARTY BE LIABLE TO THE OTHER PARTY OR ANY OTHER PERSON, FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL, PUNITIVE OR EXEMPLARY DAMAGES OR LOST PROFITS, EVEN IF THE PARTY AT DEFAULT OR BREACH HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THESE LIMITATIONS SHALL APPLY EVEN IF ANY REMEDIES FAIL OF THEIR ESSENTIAL PURPOSE.

VIII. CONFIDENTIAL INFORMATION

A. Treatment of Confidential Information. Each Party shall maintain the Confidential Information of the other Party in confidence, and shall not disclose, divulge or otherwise communicate such Confidential Information to others, or use it for any purpose, except pursuant to, and in order to carry out, the terms and objectives of this Agreement, and hereby agrees to exercise every reasonable precaution to prevent and restrain the unauthorized disclosure (except to the extent necessary incident to the use or sale of Licensed Products) of such Confidential Information by any of its directors, officers, employees, consultants, subcontractors or agents.

B. Release from Restrictions. The provisions of Section VIII.A shall not apply to any Confidential Information disclosed hereunder which: (a) was known or used by the receiving Party prior to its date of disclosure to the receiving Party, as evidenced by the prior written records of the receiving Party; or (b) either before or after the date of the disclosure to the receiving Party is lawfully disclosed to the receiving Party by sources other than the disclosing Party rightfully in possession of the Confidential Information; or (c) either before or after the date of the disclosure to the receiving Party becomes published or generally known to the public, other than through the sale of Licensed Products in the ordinary course, through no fault or omission on the part of the receiving Party or an affiliated party; or (d) is independently developed by or for the receiving Party without reference to or reliance upon the Confidential Information; or (e) is required to be disclosed by the receiving Party to comply with applicable laws, to defend or prosecute litigation or to comply with governmental regulations, provided that the receiving Party provides prior written notice of such disclosure to the other Party and takes reasonable and lawful actions to avoid and/or minimize the degree of such disclosure.

In any event, both Parties shall be released from any confidential obligations under Section VIII.A after a period of 7 years from the date of receipt of the said Confidential Information.

B. Mutual Termination. This Agreement may be terminated forthwith upon written notice to that effect by a Party, if any of the following occurs:
